L004: number diagnostic and repair

F1

Tomorrow find 0.63×100 and round 5.278 to 2 decimal places.

F2

Before L004, estimate 18.9×3.1 . Explain what an estimate can and cannot check.

Read before the next lesson

A useful check must test the original calculation. An inverse check undoes an operation; an estimate checks size. For 18.9×3.1 , $20 \times 3 = 60$ suggests an answer near 60, not 6 or 600.

Bring your methods and one question. Retry F1 in one week.
