L005: factors, multiples and primes

F1

Tomorrow calculate $-11 - (-4)$, $18 \div 3 \times 2$ and 0.29×100 .

F2

Before L005, list the positive factors of 12. Which of 1, 2, 9 and 11 are prime?

Read before the next lesson

A factor divides a whole number exactly. The positive factors of 12 are 1, 2, 3, 4, 6 and 12. A prime is an integer greater than 1 with exactly two positive factors. Pair factors systematically to avoid missing one.

Bring your methods and one question. Retry F1 in one week.
