L006: Fractions and equivalent forms

F1

Tomorrow write 28 as a product of primes and find HCF of 14 and 21.

F2

Before L006, explain why $\frac{2}{3}$ and $\frac{4}{6}$ represent the same amount of the same whole.

Read before the next lesson

Multiplying or dividing the top and bottom of a fraction by the same non-zero number preserves its value. The whole stays fixed. We will use common factors to simplify.

Bring your methods and one question. Retry F1 in one week.
