L026: Triangles and polygons

F1

Tomorrow find the supplement of 127° and explain.

F2

Before L026, a triangle has angles 50° and 60° . Find the third.

Read before the next lesson

A line through a triangle vertex parallel to the opposite side lets alternate angles transfer onto a straight line. This explains the triangle angle sum of 180° .

Bring your methods and one question. Retry F1 in one week.
