L028: Constructions and loci

F1

Tomorrow give one reason AAA does not establish congruence.

F2

Before L028, explain what equidistant from A and B means.

Read before the next lesson

A perpendicular bisector is the set of points equally distant from two fixed points. Equal-radius compass arcs from the endpoints identify two such points; joining them creates the line.

Bring your methods and one question. Retry F1 in one week.
