

Learner workbook: Mixed modelling and checking

Objective: Form a mathematical model, solve it and interpret its limitations.

Calculator condition: Non-calculator core; calculator optional only for checking where labelled.

Connect & Check

- State the objective and timeline. Retrieve proof and algebraic structure or a prerequisite. Diagnose a common error before modelling.
- Write one starting question you want answered today.

Choose your route

Route A: Visual Use a diagram, graph, table or annotation first.	Route B: Method Use a worked method, formula or calculation chain first.	Route C: Explain Start with words: what is known, what is changing, and why.
--	--	--

Share

- Pairs compare methods or predict a result for mixed modelling and checking. Ask for a reason, not only an answer.

Present

- Compare models for a situation; identify assumptions and check reasonableness

Apply: supported to independent

Recall: Retrieve the key fact or method needed for mixed modelling and checking.

Working: _____

Check/explanation: _____

Core practice: A phone plan costs £12 plus 8p per text. Write a formula and find the cost for 125 texts.

Working: _____

Check/explanation: _____

Reasoning: A rectangle has perimeter 40 cm. Express area in terms of width x and find width for length 12 cm.

Working: _____

Check/explanation: _____

Exam-style: Solve an exam-style problem involving mixed modelling and checking. Show working, include a check and interpret your answer.

Working: _____

Check/explanation: _____

Recall & Review

- Revisit the objective. Learners solve a fresh item without prompts, explain a check, correct one error and record the next practice.

WWW: _____ EBI: _____

Recall & Review: feedback and extension integration

Lesson L092: Mixed modelling and checking

Objective: Form a mathematical model, solve it and interpret its limitations.

Timing for a 60-minute lesson

0-7 Connect & Check; 7-14 Share; 14-25 Present/model; 25-44 Apply route choice/practice; 44-52 independent exam-style check; 52-60 Recall & Review, WWW/EBI and next step.

Recall & Review evidence

At the end of the lesson, solve a fresh question without prompts, explain one check, correct one error and record the next practice step.

What Went Well (WWW)

I used my working and assessment evidence to identify the exact mathematical step that was secure and the specific misconception that needs attention.

Even Better If (EBI)

I will correct one precise step, explain why the correction works and complete a fresh delayed question without the original scaffold.

Integrated stretch and deep challenge

Stretch: A phone plan costs £12 plus 8p per text. Write a formula and find the cost for 125 texts.

Deep challenge: A rectangle has perimeter 40 cm. Express area in terms of width x and find width for length 12 cm.
