

Ethnicity and achievement patterns - Flipped Learning

Prepare for L020: Racism and institutional processes

Before the next lesson

1. Define labelling, teacher expectations and institutional racism using your existing course notes.
2. Identify one school process that could create unequal opportunities without being an individual pupil characteristic.
3. Write one question that would distinguish a school-process explanation from a family/material explanation.
4. Bring one example of a policy, allocation decision or routine that could be investigated sociologically.

Retrieval bridge

In one paragraph, explain why today's lesson cannot conclude that ethnicity itself causes attainment differences.

Stretch preparation

How could a school-level process produce different average outcomes while still allowing considerable variation within every ethnic group?
