AQA A Level Sociology 7192 • L004 • v1.0 • 15 marks • 15 minutes

CONNECT & CHECK | SHARE | PRESENT | APPLY | RECALL & REVIEW

Complete without notes after the lesson or for independent consolidation. This original classroom test is separate from the six-item workbook retrieval quiz.

**1 Define a household using the stated residential rule. [2]**

---

---

**2 Explain one difference between family and household. [3]**

---

---

---

**3 Identify the term for a research counting rule. [1]**

---

---

## Evidence and application

Four fictional cases. In A, B and C, all residents share one address, cooking facilities and a living room. A: Leila and Jo are a couple living with their dependent child. B: three unrelated adult friends live together; no resident lives with their partner or child. C: a couple and their dependent child live with one unpartnered grandparent. D: a separated parent lives alone; their child has their usual home elsewhere, with regular care and contact across addresses. Classify without ranking relationships.

### 4 Classify cases A and B: how many households, and how many ONS families, in each? [4]

---

---

---

---

### 5 Explain one limit of using household membership to study care. [2]

---

---

---

---

### 6 Using case D, explain why the definition used matters. [3]

---

---

---

---

### After marking

Score \_\_\_\_ / 15. Correct your least secure idea and explain it again tomorrow. This diagnostic score is not a predicted grade.
