

Formative mini test

AQA A Level Sociology 7192 • L012 • v1.0 • 15 marks • 15 minutes

CONNECT & CHECK | SHARE | PRESENT | APPLY | RECALL & REVIEW

Complete without notes after the lesson or for independent consolidation. This original classroom test is separate from the six-item workbook retrieval quiz.

1 Define patriarchy. [2]

2 Explain why chore counts alone may miss inequality. [3]

3 Name the combination of paid work and substantial unpaid domestic work. [1]

Evidence and application

Fictional case: Maya and Leo both work for pay. They alternate cooking, but Maya organises appointments, tracks supplies and adjusts her hours when care is needed. Leo normally decides how shared savings are used. Maya proposes a planning rota and equal discussion of major spending. Neither person's behaviour is explained by biology, and the case makes no claim about all women or men.

4 Explain two dimensions of inequality in the Maya and Leo case. [4]

5 Explain one possible effect of a planning rota. [2]

6 Explain why a biological conclusion is not established by this case. [3]

After marking

Score ____ / 15. Correct your least secure idea and explain it again tomorrow. This diagnostic score is not a predicted grade.
