

Formative mini test

AQA A Level Sociology 7192 • L018 • v1.0 • 15 marks • 15 minutes

CONNECT & CHECK | SHARE | PRESENT | APPLY | RECALL & REVIEW

Complete without notes after the lesson or for independent consolidation. This original classroom test is separate from the six-item workbook retrieval quiz.

1 Distinguish a count from a rate. [2]

2 Identify the category, place and year for the figure 231,949. [3]

3 Name the concept for moving a wedding to a later age. [1]

Evidence and application

Fictional comparison: Rowan and Jules live together and hope to marry after saving for housing. Priya and Ellis regard their continuing cohabitation as a committed arrangement and do not currently plan a wedding. Morgan and Lee married in 2023 after delaying their ceremony during the pandemic. A commentator treats all three as evidence that marriage has become meaningless. The accounts are invented and illustrate distinct processes; they do not establish how common any motive is.

4 Explain two different processes in the fictional comparison. [4]

5 Why is current unmarried status not evidence of lifetime non-marriage? [2]

6 Suggest how to test a claim that changing values cause later marriage. [3]

After marking

Score ____ / 15. Correct your least secure idea and explain it again tomorrow. This diagnostic score is not a predicted grade.
