

Formative mini test

AQA A Level Sociology 7192 • L019 • v1.0 • 15 marks • 15 minutes

CONNECT & CHECK | SHARE | PRESENT | APPLY | RECALL & REVIEW

Complete without notes after the lesson or for independent consolidation. This original classroom test is separate from the six-item workbook retrieval quiz.

1 Distinguish a current arrangement from a trajectory. [2]

2 Interpret the 17.0% to 17.6% comparison accurately. [3]

3 Name research following the same couples over time. [1]

Evidence and application

Fictional life histories: Alex and Remy cohabit while planning a marriage after a training course. Sana and Kit cohabit, share parenting and say a wedding is not part of their current plans. Drew and Pat moved in together when two rents became unaffordable, while disagreeing about future marriage. Two years later their plans could change. A researcher records all three under one cohabiting category and assumes they share the same motives and future. These invented accounts are not a representative sample.

4 Explain two different meanings or constraints in the fictional case. [4]

5 Why does living together not reveal a couple's view of marriage? [2]

6 Explain one limitation of comparing outcomes by legal status alone. [3]

After marking

Score ____ / 15. Correct your least secure idea and explain it again tomorrow. This diagnostic score is not a predicted grade.
